If you are unable to work on any evening please contact someone else on the list. Please remember to transpose the music down 3-4 keys to get the songs within a range most people can sing. Also, if the song doesn't give you a chance to breath between verses, entering 5001 will give you one extra beat, 5002 will give you two beats... this can be entered any time after you put the hymn number in. If it is a difficult song it is much easier to sing with the piano or piano/organ combination. Call me if you need help. Thanks to all of you. Mary Bilotft
