January 6, 2016	-	January 30, 2016	Landon Jansen
February 6, 2016	-	February 20, 2016	Sheila Kalin

WE APPRECIATE YOUR HELP & ARE HAPPY TO SIT WITH YOU IF YOU JUST ASK ANY OF US.

To Everyone: If you are unable to work on any evening please contact someone else on the list. Please remember to transpose the music down 3-4 keys to get the songs within a range most people can sing. Remember if it doesn't give you a chance to breath between verses, entering 5001 will give you one extra beat, 5002 will give you two beats... this can be entered any time after you put the hymn number is entered. If it is a difficult song it is much easier to sing with the piano or piano/organ combination. If you forget and don't hit Intro key and you just start the song and waste a whole verse for the introduction you can change the number of verses right while the song is playing and it won't hurt a thing. If you wanted to sing 3 verses and used one for the intro, no worries - - just hit "4" "verses" "4" and you are good to go. Call me if you need help. Thanks to all of you. Mary Bilstoft
